Appl. Serial No. 10/620,117 to Robert A. Matousek Art Unit 3652 Response to July 28, 2005 Final Office Action Page 2

In The Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- 1 1. (Previously Presented) A system for unloading grain from an agricultural combine, comprising:
- a) an unloading conduit assembly for unloading grain from the combine into
- 4 a grain truck or the like displaced horizontally from the grain tank;
- 5 b) said unloading conduit assembly including a vertical conduit and a
- 6 horizontal conduit mounted on top of said vertical conduit, said horizontal conduit having
- 7 an extent greater than an extent of said vertical conduit;
- 8 c) said vertical conduit being mounted on the combine for rotational
- 9 movement of at least a portion of the vertical conduit about its vertical axis; and
- d) said vertical conduit also being mounted on the combine for sideways
- pivoting of at least a portion of the vertical conduit about a horizontal pivot axis to permit
- 12 retracting said horizontal conduit into a storage position on one side of said tank.
- 1 2. (Original) The unloading system of Claim 1 further characterized in that:
- a) said vertical conduit is mounted on the combine for rotation of the entire
- 3 vertical conduit about said vertical axis.
- 1 3. (Original) The unloading system of Claim 1 further characterized in that:
- a) said vertical conduit is mounted on the combine for sideways pivoting of
- 3 the entire vertical conduit about said horizontal pivot axis.
- 1 4. (Previously Presented) A system for unloading harvested product from an
- 2 agricultural combine, comprising:
- a) an unloading conduit assembly for unloading product into a truck or the
- 4 like located on any radius horizontally around the combine;

Appl. Serial No. 10/620,117 to Robert A. Matousek Art Unit 3652 Response to July 28, 2005 Final Office Action Page 3

- b) said unloading conduit assembly including a vertical conduit extending upwardly out of the top of a storage tank and a horizontal conduit extending radially from said vertical conduit, said horizontal conduit having an extent greater than an extent of said vertical conduit;
- 9 c) said vertical conduit being mounted in the tank for sideways pivoting of 10 at least a portion of the vertical conduit about a horizontal pivot axis to permit retracting 11 said horizontal conduit into a storage position on one side of said tank and below the 12 level of the top of the tank.
- 1 5. (Previously Presented) The unloading system of Claim 4 further characterized in 2 that:
- a) said vertical conduit includes a lower section, an intermediate section and an upper section;
- b) said intermediate and upper sections being rotatable relative to said lower section about an axis common to said upper section, said intermediate section, and said lower section.
- 1 6. (Original) The unloading system of Claim 5 further characterized in that:
- a) said upper section is mounted on said intermediate section for pivoting
 movement about said horizontal pivot axis.
- 1 7. (Original) The unloading system of Claim 4 further characterized in that:
- 2 a) said vertical conduit is pivotable in its entirety about said horizontal pivot 3 axis.
- 8. (Currently Amended) An agricultural combine including a threshing assembly for supplying grain to a grain tank and a system for unloading grain from said combine, the system comprising:
- a) a loop conveyor assembly for conveying grain from said threshing
 said grain tank or to an unloading conduit assembly;

Appl. Serial No. 10/620,117 to Robert A. Matousek Art Unit 3652 Response to July 28, 2005 Final Office Action Page 4

- b) said unloading conduit assembly including an unloading conduit for
 receiving grain from said loop conveyor and conveying it to a truck or the like located on
 any radius horizontally around the combine;
- 9 c) said unloading conduit including a horizontal conduit which is retractable 10 into an unoperative, stored position on said combine.
- 1 9. (Original) The agricultural combine of Claim 8 further characterized in that:
- 2 a) said unloading conduit includes a vertical conduit extending upwardly out
 3 of the top of a storage tank and a horizontal conduit extending radially from said vertical
 4 conduit;
- b) said vertical conduit being mounted in the grain tank for sideways
 pivoting of at least a portion of the vertical conduit about a horizontal pivot axis to permit
 retracting said horizontal conduit into a storage position below the level of the top of the
 tank.
